EDUCATION

University of California, Irvine Irvine, CA
Donald Bren School of Information and Computer Sciences September 2023 - Present
B.S. Game Design and Interactive Media GPA 3.8/4.0

INTERNSHIP

MiHoYo Technology Co., Ltd. Shanghai, China
System Designer, Game Designer June 2025 - September 2025; June 2026 - September 2026

- Conducted functional testing based on design specifications, documented and reported bugs, and submitted feature optimization suggestions.
- Translated system concepts into concrete gameplay implementations, collaborating with the team to refine core mechanics.

PERSONAL PROJECT

Hell or Sell Irvine, CA
Lead Designer, Project Manager September 2025 - Present

- System Design & Level Design: Create system diagrams for the game and iteratively refine designs based on feedback and requirements. Design levels tailored to players' learning progression and introducing corresponding gameplay variations.
- Collaboration: Participate from project initiation, clarified key development priorities, and coordinated task scheduling to ensure steady progress

RatO.oLight Irvine, CA
Project Manager, Lead Designer October 2024

- Led cross-disciplinary collaboration among art, programming, design, and audio teams to ensure a cohesive gameplay experience.
- Took responsibility for level design and construction, optimized difficulty curves, and improved puzzle logic clarity to enhance overall player comprehension.

SCHOOL EXPERIENCE

University of California Irvine Video Game Design Club
Which Witch is Gonna Be Rich? - *Lead Designer* February 2025 - April 2025

- Focuses on designing subtle decision-guidance mechanisms that allow players to engage in strategic thinking and choice-making within a fast-paced experience. Achieving dynamic balance between pacing and system functions.

SKILLS

Unity: Working knowledge **Language:** English, Mandarin
System Design: Gameplay systems, progression loops, and balance iteration
Level Design: Player learning curves, pacing, and mechanic-driven level structure
Project Management: Cross-disciplinary coordination and feature ownership
