EDUCATION

University of California, Irvine Irvine, CA
Donald Bren School of Information and Computer Sciences September 2023 - Present
B.S. Game Design and Interactive Media GPA 3.8/4.0

PROFESSIONAL EXPERIENCE

MiHoYo Technology Co., Ltd. Shanghai, China
System Designer, Game Designer Intern June2025 - September2025; June2026 - September2026

- Designed enemy movement, projectile patterns, and player interactions for a shipped 2D bullet-dodging event.
- Designed and configured shipped Genius Invokation TCG cards in JSON; playtested mechanics and adjusted balance.
- Tested multiplayer UGC lobby, party, and menu flows; reviewed UI behavior and coordinated fixes with QA and engineers.

SELECTED PERSONAL PROJECT

Hell or Sell Irvine, CA
Lead Designer, Project Manager September 2025 - Present

- Led a 12-person cross-disciplinary team, coordinating weekly meetings, development priorities, feature scope, and design-to-implementation across design, programming, and art.
- Designed the core loop, inventory, shop economy, progression, scoring, and UI/UX; iterated through playtesting and production constraints to simplify overly complex systems and refocus the experience around varied inventory layouts and level-specific challenges.

RatO.oLight Irvine, CA
Project Manager, Lead Designer October 2024

- Rescoped an overly ambitious parkour concept into a puzzle-platformer, preserving its light-and-shadow mechanic while designing new interactions where different light conditions affect environmental objects.
- Designed and built 10 progressive puzzle rooms in Unity using sprite-based assets, teaching movement, item collection, and mechanics entirely through level design without text, resulting in a polished ~15-minute playable game within a three-week development cycle.

Waltz of Weights
Gameplay Designer / Level Designer 3-person Game Jam Team | Unity | 3 Days

- Designed a 3D puzzle game around three weight states and dual-character controls, creating puzzles that require players to combine distinct abilities.
- Developed gameplay rules and puzzle progression around character possession and weight-changing mechanics, delivering a playable prototype within a three-day game jam.

SKILLS

Designs: System Design, Game Design, Level Design, Prototyping, Playtesting
Tools: Unity, Github, Prforce, Git/Github, C#
Language: English, Mandarin Chinese
